

# Looking deeper into soils

## Tour of soil management options

Growers and consultants are invited to tour with soil constraints experts from Department of Agriculture and Food, Western Australia and research organisations to look at soil management options.

Join the tour to visit both large scale and research sites investigating:

- Multiple soil constraints
- Frost interaction with ploughing
- Return on investment of incorporating lime to depth
- Water repellent soil agronomy
- Deep ripping and deep delving
- On-row versus off-row seeding
- Organic matter incorporation

### Main tour: first two days only

Day 1: Perth – Albany (24 July)

Day 2: Albany – Esperance (25 July)

### Esperance option: one extra day

Day 3 (morning):

Day 3 (afternoon): Grass Patch

### Corrigin option: two extra days

Esperance (26 July)

Day 3 (afternoon): Esperance – Corrigin

Day 4: Corrigin – Perth (27 July)

**Date:** Commences Monday 24 July 2017, with multiple tour options available

**Cost:** \$120 per day (includes meals and accommodation)

For more information or to RSVP (by 14 July) please contact: Glenn McDonald, Research Officer, Albany on +61 (0)8 9892 8524 or [glenn.mcdonald@agric.wa.gov.au](mailto:glenn.mcdonald@agric.wa.gov.au)
