

The Gillamii presents.

## “Those problem soils.”

**Are you asking yourself;**

*“What options are there for non-wetting?”*

*“What’s with this new biochar thing?”*

*“What else can the Gillamii offer you?”*

**Come kick a tyre with us in the paddock**

**When?**

**Friday the 20<sup>th</sup> of April**

**Where?**

**Spriggs farm 495 Weir Road**

**Time?**

**3pm followed by a sundowner**

The results are in come join us for a few hours in the paddock and have a chinwag to Glenn McDonald about which method came out as the victor of the Non-wetting trial that the Department of Primary Industries and Regional Development DPIRD (formally known as Ag Dept) and the Gillamii have run over the last 5 years.

Come and chat to Ron Master about the new Bio Char trial that has just gotten underway. This trial is also being implemented by DRIRD and looks at the impact of three different biochar’s and rates and the effect they have on macro nutrient availability.

Did you know that the Gillamii have an equipment hire service. We hire out a number of different things, including a Ripper Moulder, fox and cat traps, motion cameras and a Chatfield easy planter. We will be demonstrating how they how they work so stick around and see if they could be of use to you.
