

Soil Health and Carbon Farming Seminar

Join world renowned agricultural educator and speaker, Dr Terry McCosker to hear how you can reduce inputs while improving the production and health of your land.

Dr Terry McCosker

Director, RCS

Terry has been an innovator in Australian agriculture for over 50 years. His research has led to many world-first achievements, and he is well known for bringing numerous innovations to the industry through his role in RCS. Terry is forging inroads into the world of soil health and carbon trading, paving the way for graziers to realise **significant financial gains** through soil carbon projects whilst running **productive, regenerative farming and grazing enterprises**.

TOPICS:

- ❖ The carbon cycle and sequestering carbon in your soil
- ❖ The importance of soil biology and its role in sequestration
- ❖ The Biologically Enhanced Agricultural Management (BEAM) approach and its benefits
- ❖ The 6 regenerative soil and plant health principles
- ❖ Trading soil carbon

VISITING:

Katanning..... 17th June

Time: 11am - 3:00pm

Geraldton..... 19th June
