

Ag Futures 2035

Do you want to help shape the future of Western Australian Agriculture?
What might the sector look like in 2035 if we dare to “think the unthinkable”?

How will production, processing, value-adding and marketing be integrated across the State and internationally? Will ecosystem services be a valued agricultural ‘output’? How will farmed food compete with the factory kind? What will be the balance of small and large enterprises?
How much can agribusiness grow the Western Australian Economy?

How can you position yourself to be part of this bright and exciting future and what human and technological capabilities must your organisation develop to maximise success in a rapidly changing world?
