

MOORA - MILING PASTURE IMPROVEMENT GROUP

Pasture Field Walk

Thursday 14th October

2.00pm

“Strathmore”, Dandaragan

10km NW of Dandaragan on the Badgingarra Rd

Tedera is a new perennial legume pasture capable of producing out of season liveweight gain in sheep and cattle. MMPIG has a MLA funded Producer Demonstration Site project measuring animal production from 4 local stands. Hear from Tedera expert Daniel Real, DPIRD, and local farmer Zac Roberts who hosts the site. Zac will also show us some other impressive pastures including Panic Grass, Yellow and French Serradella and Biserrula with the help of Angelo Loi, Dryland Pasture System Project, DPIRD. Refreshments to follow.
